I would like to contribute to your organization as a full-stack web developer, leveraging my ability to develop E-commerce web applications using readily available web frameworks. With my passion for learning, I will be able to take part in empowering your team with my newly found coding expertise.

My strengths are creativity, integrity and passion in learning/coding. Creativity is needed by every company when making a product in order to increase in sales or/and in views. A good design captivates the eyes of users which can attract guests to buy into the product. Integrity is simply doing the right thing when no one is looking and every company needs an employee that they can trust and rely on. Passion in learning/coding is what keeps me going, a company needs a self motivated employee that needs small supervision in order to finish tasks.

AREAS OF EXPERTISE

Hard skills
- Frontend: HTML, CSS, Vue.js
